Applicant called Examiners Graham and Marcheschi on 22 June 2010 for

clarification as to a) why the Examiners felt their current position with respect to the prior

art were valid rejections, and b) why Applicant's arguments presented to date were not

convincing to the Examiners to overcome the rejections. Inventor David Hobson explained

his interpretation of his invention as contrasted to the prior art (especially the Forsberg

patent), which Applicant sees as a gelled product rather than a low viscosity dispersion. All

of the claims were discussed and the prior art (as applied by the Examiner) was discussed.

This is the sum and substance of the interview. No exhibits were supplied or

discussed. No agreement with respect to the claims was reached.

Applicant has reviewed the Examiner's written summary of the Interview and does

not contest any of the statements made therein.

Should any additional fees be required to process this Amendment, Applicant

hereby authorizes payment of said fees from The Lubrizol Corporation Deposit Account No.

12-2275.

Respectfully submitted,

/ Samuel B. Laferty /
